COMPENG 2SH4 Project – Statement of Contribution

Your Group Name   marcy_reunion

Your Name   Aiishwin Muraliytharan

Your Team Member's Name   Meshak Sharma

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. **Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.**

   For my contributions I worked on iteration 1A and 2A. I also took the lead for iteration 3. I worked on classes like objPos, Player, objPosArrayList, Food and Project.

2. **Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.**

   For my partners contributions he worked on iteration 1B and 2B. He took the lead for the bonus section of the project. He worked on classes like GameMechs, Food, objArrayList and Project.

3. **Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.**
   I think it was a great experience. For me personally, I think one valuable thing I took away from it was the whole collaborative aspect over GitHub. I loved that I learned how to use and understand the whole git flow system. I think it will be very beneficial to me when I go on to work for companies and many developers are collaborating on many different branches within a repo. Overall I think everything worked great and I'm glad I was able to take away many great tools from this project!
